INDIAN ECONOMY

DEVELOPMENT EXPERIENCE OF INDIA
India's Development Experience: Policies, Priorities land penformance Post
-independence Development Policy Regions.
for the first four decades after independence (in 1947)
India followed a development Strategy of import
Substituting Industrialisation, largely inspired by the Soviet
- Centeral economic planning
- a mixed economy blas envisaged
- Clearly assigned male for the private Sector, but With
bervaive pregulatory Control by the government
- the public Section was expected to Sneach the
"Commanding heights" of the economy.
Post-Independence development Stantegy (till mid-1980s)
- Restauctions on foreign investments; torade areceived very
little attention, import Substitution for "Self reliance,"
Was the buzz Word, Indian planners Were effectively
Operating under the assumption of a nearly closed economy
- The Second 3 year plan model was in a Sense the back
bone of India's post-independence development storategy.
- It Closely nesembled feldman's model of the Soviet
Union in the 1920s,
- Storess on theavy industries (cabital goods Section) brimarily
under the aggis of the state. Genesis of India's strategu
- Storess on theory industries (Capital goods Section) primarily under the aegis of the state Chenesis of Thidials Strategy of import Substituting Industrillisation for Self auliance

Long Legery of Colonical mule - do India's Storategy of
Import Substitution do away With all elements of dependence
On this Western World.
- Important to Signal to the nest of the World India's
Capable of doing What the mest of World Can do-
'Nebruvian' Socialism - lack of faith in the market
. Jole of State emphasized
- Influence of the latin American Structuralist
School of thought - elastically bessimism and Inequalising to ade.
- Standard argument of infant industry protection.
- Almost all developing nations embraced import Substi-
tution at the time. This Strategy Was almost
universally endoused by the international development
La Dia Cia ala
palicy Civicle.
- Unleash the topper in you
Post Independence Torade policy Pore 1966: Pervasive
import and
exchange Control bodicy vielaying primarily on quantive
prestonictions (QRs)
- Based On detailed estimate of foreign exchange
availability made by the Ministery of Finance
- After pre-empting for essential requirements (Embass
expenses, food fortiliser and betoraleum imports), the
nest was allocated to Competing users through the
mechanism of import licensing.
- Two principle Pritoria (1) essentiality and (2) indigeous
non availability, but absence of Hell defined
set of Objective posinciplis.

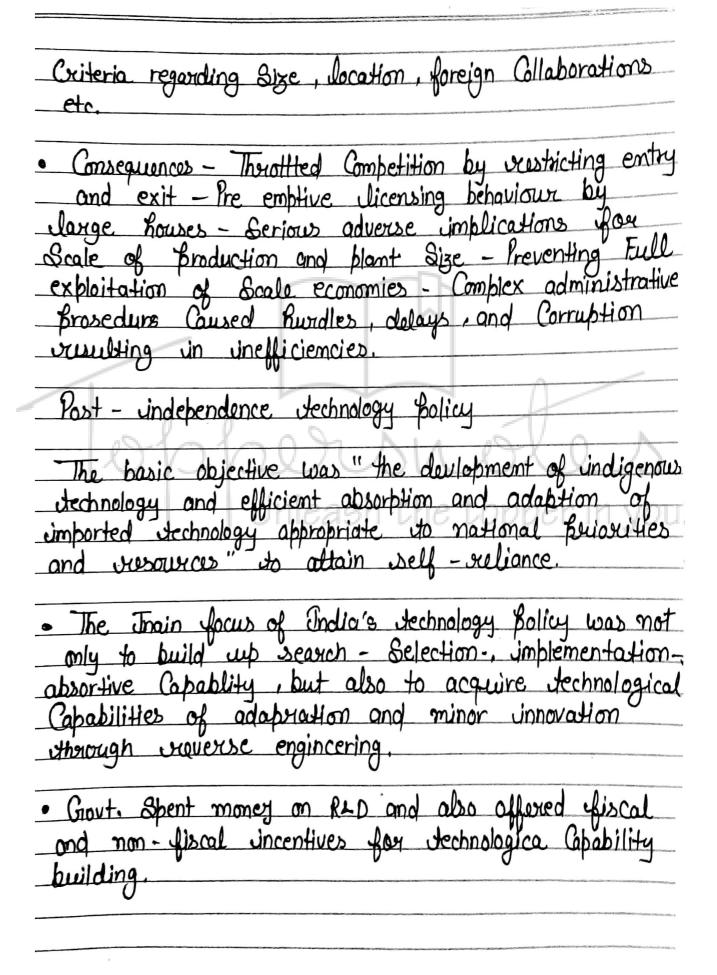

- Profesence given to Small Scale (Over Jarge Sale)
and public Sector (Over private Sector)
1962 Onwards! ORS Were Supplemented by increasing
use of import dutres.
Export bolicy - intrally an attitude of indifference and
"pessimistic neglect" - there were exports during the first two plans)
Fixist two plans)
From the third blan (1961/62) deliberate bolicies of
expant promotion through expant incentive (Subsidies
, Ascal incentive, and import entitlements.).
1 - 1 - 1 - 0 S-2-1 N - 1 - 5 V 2 C - 1 N
Devalution of 1966 - a full policy backage of devalution
Nith Diberlisation - 57.5 40 devalution of the subsec-
Substantial elimination of export incentives on hon
toraditional exports - official declaration of a policy
of liberlized import licensing and preduced import
duties ·
Post 1966:— Strinkally early previval of export Subsidies
- Continuation of ORs driven imposit Control regine
- Import tariffs remained unusually high by international
Standards - 140% + for 70% of Dipes 100% + 88% of
lines and 99 % of all traffic lines. To Summarise
The Objective of India 18 inwards - Jooking Sale
strategy of imposit Substitutions was to set up domestic
Industrial Capacity for Whichever goods (Consumer and
broducer) could be produced domestically and protect them

Forom thternational Comptetion - Very high effective Rate
of Ponotection (ERP) - Calculations by Bhagwati
and Strinivasan (1975) - Disported the southce affocation
towards Cabital Intensive Industries that Would
Otherwise be unprofitable domestically under an
"efficient" market determined allocation of presources To
Summarise - Storong anti-exposit bias in the pregime
Sought to be countered With export incentives -
Bhagwati and Desai (1970) abily Summarises "India
Should broduce Whatever it can and Should export
Whatever it produces, (2) encouraged diverifield basket
of manufactures (Import Substitutes) being produced
and exhanted . Combletely ignoxing the dicates of
and exposited Completely ignoring the dicates of natural Comparative advantage.

3 .2.	Economic defoums since 1991 - New Economic
	policy (NEB)
	Economic suforms or structural adjustment is a long-
	turn multi-dimensional package of vacious policies
	and programmes for further economic development. It
	Includes reformsin agriculture sector, industrial sector,
	Fingencial sector, fiscal sector, international trade etc.
	economics reforms were undertaken by the Nausimha
	P Continues area unalitation by the Nausimha
	Rao Government in July 1991.
	I I Unicasii uic uuppei iii yuu
3.2.1	Objectives of NEP 1991
	The objective of New Economic Policy are:
(a)	To reduce fiscal deficit and to have relative price stability.
(6)	To reduce the area of operation of the public sector
	and to open up more than areas for the private sector
(0)	To liberalise industrial policy and abolish industrial
	licensing for most of the private sector industries.
- (d)	licensing for most of the private sector industries. To encourage inflow of foreign capital by granting more concessions to foreign direct investment. To liberalise foreign direct by reducing traviff duties and abolishing quota relations in case of many imports.
	concessions to forcion direct investment.
(e)	To liberalise foreign liade by reducing toxiff duties and
	abolishing quota substitutions in case of many impossing
	0

	The new Economic policy is also called the Policy of "Economic Reforms" since seeks to remove the
	"Economic Reforms" since seeks to remove the
	inefficiencles in the economic system.

3.20	- Compose of NEP 1991
	The two components of NEP, 1991 are?
1.	Macroeconomic Stabilisation - Demand Side Management.
	Macroeconomic stabilisation polities are shout - run
	measures to vietium to low and stable inflation and
	a sustainable fiscal and balance of payments position.
,	Thus, stabilisation foolicies beings about demend side
	monagement which includes measures like?-
(a)	Control of Inflation.
	Fiscal coinection.
(C)	
	Unleash the topper in you
2.	Structural Adjustment - Supply Side Management
	Smutural adjustment policies are long-rum measures
	to remove the bottlenecks and obstacles in the growth
	both of an economy. These bolives being about subbly
	like side monagement which includes measure like:
(a)	Trade and capital flow suforms
(6)	Industrial deregulation.
(0)	0 140
(d)	Financial sector reforms.
	The goals of structural sufavors is to abolish controls
	The goals of structural sectorms is to abolish controls eliminate bureaucratic hundres and redtapism and
	make the decision making process efficient and
	transparent.
	·

3.2.93	NEP-Policy of Liberalisation, Privatisation and Glo
	In the NEP 1991, structural reforms can be seen with
	desperter to:
1.	liberalisation.
2	Buirahisation.
	Gelobalisation.
3.3	LIBERALISATION
3.3.1	Meaning of Liberalisation
	liberalisation means removing all unnecessary contrals
	and subjections like plunik, licenses, materionist duties.
	quotas etc. Imposed by the announcest.
	Puier to 1991, government was enforcing regulation in
	smarry ways:
<u>(a)</u>	Industrial licensing (in this every entrepreneur had to get
	permission from government to start a firm, expand
	a fish, or to skul production of an new good).
(b)	Penirale sector was not allowed in many industries.
(C)	Some goods could be produced only in small scale industries.
(d)_	Risce controls and control on distuibution of selected
	industrial products.
<u>(e)</u>	1
(b)	Foreign exchange control.
<u>(g)</u>	Restorctions on investment by big business house etc.
	These controls resulted in:
(9)	Consumption delays.
<u>(d)</u>	Losses.
(c)	High cost economy.

3.3.2	Objectives of liberalisation.
	It was believed that market forces would guide the
	conomy in a more effective manney with wellisation.
	Countries like kovea, Singapose and Thouland which
	gained rapid economics development due to liberali-
-	sation had set and examples.
	Objective of the policy of liberalisation in 1991, were:
1	to starse infermal competitiveness of industrial production.
2.	To rase foreign investment and technology.
<u></u>	To reduce debt burden of the country.
~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~	To get an opportunity to expout to developed countries
	and to impout capital goods and machinery from them.
.2.2.2	Libenslisation Measures.
	Liberalisation was introduced in many away in Tuly
	Liberalisation was introduced in many greas in July 1991. These were:
	1 1 Ombash one reportingou
1.	Industrial Sector Reforms
-	Government announced the New Industrial Policy in 1991.
	The main industrial verforms were:
1,	Abolition of industrial licensing: Andustrial licensing
	was abolished for all projects except for 6
	was abolished for all forejects except for 6 industries ordated to security and strategic concerns and items of elitist consumption. These industries are:
(1)	liquor
	igavettes.
,	industrial explosives,
[] []	défense equipments
(V)	drugs and pharmaceuticals, and
(Vi)	demgerous chemicals.
	10

	Contraction of Public Sector:
	The number of industries exclusively reserved for the
	public sector has been reeduced from 17 to 3. The only
	industries reserved for the Public sector are : défence
	equipments, atomic energy generation and eailway
	transport.
3∙	Kefours in Small Scale Sector: According to the new
	policy investment limit of small scale industries
	has been inculased to one crove with a view to
	modernise them. Many goods produced by SSI units have
	now been de -reserved.
4,	Concession in the MRTP Act :- The new industrial policy
	surapped the threshold limit of assets in respect of
	MRTP and dominant undutakings. These forms will now
	be at per with others, and not require perior approval
	from the government for investment in the delicenesed
	industries. The MRTP Act has been accordingly amended. The new act gives move emphasis to the prevention and control of monopolistic, elestrictive and unfair
	and control of manapalitic westriction and water
	trade practices.
	water pragress
9.	Financial Sector Reform
	Puiou to 1991, banking institutions were subject to too
	much control by the RBI through high bank rate,
	high case reserve realio and statutory liquidity ratio.
	Financial sector includes:
(a)	banking and non-banking financial finetitutions.
(b)	stock exchange market and.
(c)	foueign exchange market.
	-DO

	In India, financial sector is regulated and controlled
	by the RBI (Reserve Bank of India), Liberalisation implied:
	There was a substantial shift in hale of the RBI
	from a regulator to a facilitator of the financeal
	sector. Eaulier as a regulator, the RBI would itself
	fix interest rate structure for the commercial banks.
	After liberalisation in 1991, RBT as a facilitator would
	bonks to decide their interest reale structure. Thus,
	with liberalisation competition prevails reather than controls.
9.	Both Cash Rosenve eatio (CRR) and Statutory Liquidity Ratio
	(SLR) have been reduced to increase availability of funds
	with commercial banks to advance more cuedit.
კ.	Bank wate has been weduced. It lowered the interest scale
	charged by the commercial banks thus, encouraging cuedit.
4,	Foreign Institutional Investors (FII) such as Mouchant
	bankers mutual funds and pension funds are now allowed
	to invest in indian financial markets.
5.	There was establishment of private sector banks, Indian
	as well as foreign. Foreign investment climit in benks
	was raised to around so percent.
6.	The stock market (SEBI) has been made a statutory
	body. The Securities and Exchange Sound of india (SGBI)
	was established in 1988 with defined europonsibilities for
	development and regulation of the stock market.
	T 0.1
3.	Tax References
	Fiscal folicy refers to the public expenditure and seevence
	policies of the government. By Before 1991 both direct and
	and indicent taxes were high. This encouraged tax evasion
	and provided district to honest tax payers. Whelet
	taxes are those taxes the impact of which cannot be shifted

	onto others. Examples: income tax, wealth tex, etc. Indicad
	tames are those taxes the impact of which can be shifted
8	onto others. Example: sales fax on goods, seuvice
	tax, etc.
	Λ Λ
	After dibenalisation policy of 1991: Both direct and indirect claxes were reduced.
	Both direct and indirect staxes were reduced.
	The procedure for paying taxes was simplified.
	The procedure for paying taxes was simplified.  Non-planned expenditure by government was accounted
4,	Foreign Exchange Refours.
	Foreign Exchange Refoums.  In 1991, as an inter immediate measure to solve
	the balance of payments cursis, the surper was devalues
	against foreign wereneies. This made our goods cheaper
-	in foreign market and increased inflow of foreign
	exchange. It also fleed the determination of rupee
	value in the foreign exchange market from government
	control and made it subject to marker defermind
-	exchange vate.
-	1
	1-ffer liberalisation folicy of 1991:
	Approval was given for direct foreign investment-
<del></del>	upto 51% foreign equity in high priority industries.
2	Hutomatic permission was given for foreign technology
	Approval was given for direct foreign investment- upto 51% foreign equity in high priority industries.  Automatic permission was given for foreign technology agreements in high priority industries upto lump sum
	payment or Rs 1. Crosse.
	Here a Role Plan
	Juade Belley Reforms.
	Beione to 1991, India followed a protectionist bolicy marked by quantative vestrictions and high fariff on import, import licensing and export duties. This recoluced
A	marked by quantarive occomenous and high facility on
	import, impour sichning como export dures. This recoluced
