for the optimal allocation of resources so as to maxemize the output and social welfare. 1 Miceo - economics is concerned with the theorees of peoduct pricing, building and factor econonic welfare. Macro Economics -Macro economics deals with the functioning of the economy as a whole. It deals with the bload economic lesul, such as full employment or unemployment, capacity or under capacity perduction, low or high rate growth, inflation or deflation. V It is the theory of national encome, employment, ağgrigate consumption, savings and investment, general pice level and economic growth. Nature of Economics > Economics as science -· Economice il a systematic body of as it explains cause and effect relationship between various variables such as price, demand, supply, money su 1, production national income, empl iment, ět.

OPPURSNÓLLS Unleash the topper in you

· This is the traditional deduction method where economic theories are deduced Logical reasoning. The laws of economics or economic theories are conditional subject to the condition that other things are equal. · The truth and applicability of economic theories can be imported or challenged by confronting them to the observations of the real world. • The laws of physical and natural sciences are exact, but economic laws are not that exact and definite. > Economics as a pointive science -· A posetive science is that science en which analysis is confined to cause and effect relationship. · Positive econonics is concerned with the facts about the economy. . It studies the economic phenomena they ous exist. · It finds out the common characteristics of economic events. · It specifies cauce and effect relationship between them. 5

Central Problem of Economics common problems. Every economy faces some ~ what to produce? · A country cannot peoduce all goods because it has limeted resources. · It has to make a choice between different goods and services. · Every economy has to decide what goods and services should be peoduced. I How to peoduce ? · As an economy decides to peoduce certain goods, it faces the peoblem to decide hou these goods well be peoduced. The problem arises because of unavailability of some resources. It also involves the choice of technique of peoduction. A country may produce by labour intensive methods or by capital intensive methods of production, depending upon its stock or man power. V For whom to peoduce? · Goods and services are produced
